Chairman's statement

Overview

I am pleased to announce that the group has made good progress in the first half of 2001. We achieved strong growth, with turnover up by 17% to £399 million and customers up by 15% to 3.4 million (2000 2.9 million). Profit before tax increased 7.8% to £70.2 million (2000 £65.1m). Earnings per share increased by 7.5% from 19.08p to 20.52p per share. An interim dividend of 11.75p (2000 10.9p), an increase of 7.8%, has been declared.

UK home credit division

Explanatory note

The 2000 financial year comprised 53 working weeks, the last of which fell between Christmas and New Year. This traditionally poor week for credit issued and collections usually forms the first week of the new financial year. This has had the effect of inflating the growth in turnover, credit issued and collections in the first half of 2001 and distorting the comparison with the first half of 2000. In order to give a true comparative, adjusted 'like for like' figures are provided.

Trading in the first half of the year has been as expected. Turnover for the UK home credit division rose by 5.6% (3.4% like for like) to £224.3m and profit before tax increased by 1.7% to £61.3m (2000 £60.3m).

The UK home credit market remains competitive but stable. The market conditions we experienced in 2000 have, as expected, continued into 2001. Consequently, we have continued to focus on maintaining the quality of our lending and in the first half of this year we have further tightened our controls over customer recruitment. Customer numbers have fallen slightly (0.8%), as compared to June 2000. Bad debt as a percentage of credit issued has remained stable at 8.2% (June 2000: 8.2%). Credit issued grew by 7.3% (3.5% like for like), in the first half of 2001 to £390.6m and collections were up by 6.3% (4.5% like for like) to £634m.

We are working actively to improve our customer recruitment techniques in order to increase the recruitment and retention of good quality customers. We have recently launched a Provident branded home-shopping catalogue produced and managed by Findel plc. In addition, we intend to roll out the cross-selling of motor insurance, which we piloted successfully last year, throughout the agent network. As a result, promotional expenditure has increased by over £2m in the first half of the year and we expect to see the benefit of these initiatives in improved customer growth during the second half.

International division

In the International division, our aims for this year were to continue with rapid customer growth in Poland and the Czech Republic, bringing both countries into profit for the year, and to open pilot operations in Hungary and Slovakia. Our progress in the first half of this year has been good with both Poland and the Czech Republic reporting a profit. The division has reported turnover up 258% to £46.2m and a half year loss of £2.3m, much reduced from the £6.9m loss at the 2000 half year. This includes an investment of £1.3m in start-up losses in launching our home credit service in Hungary and Slovakia. Customer numbers for the division have increased by 141,000 (28%) to 641,000 in the first half of the year.

Poland has for the first time reported a profit of £0.9m compared to a loss of £3.4m in the first half of 2000 and customer numbers have grown by 111,000 (36.4%) from 305,000 to 416,000 in the first half of the year. The Czech Republic has reported a profit of £0.8m compared to a first half loss in 2000 of £1.4m and customer numbers grew by 23,000 (14.3%) from 161,000 to 184,000.

As expected, as the businesses mature, the bad debt rate in the fast growing Central European operations is increasing from the exceptionally low levels seen in 2000. In Poland, our largest international market, credit quality is developing broadly as expected and bad debts as a percentage of credit issued are running at around 6% (June 2000 4.3%). In the Czech Republic, bad debt as a percentage of credit issued has increased a little more than was expected to 7.25% (June 2000 4.0%) and prices have been increased to compensate for the additional costs.

South Africa remains a small part of the International division. It has experienced

tougher trading conditions and, in particular, rising levels of bad debt in the first half of this year. This is disappointing after the substantial improvement in performance seen in the second half of 2000. We have taken remedial action, shortening the maturity of loans and tightening lending criteria. We intend to review the success of these actions in the second half of this year.

Motor insurance division

The motor insurance division has performed well, benefiting from good conditions in the motor insurance market. Profits were up by 19% to £19.4m and policyholders up by 18% to 833,000. As expected, premium increases in the market have slowed significantly, averaging about 5% in the first half of this year compared to about 10% at the same time last year and there are clear signs that we have reached the top of the insurance pricing cycle.

balance

We have piloted a bill paying service in a small number of UK locations during the last year. In June we reviewed the performance of these pilots and concluded that the prospects for the service were insufficiently good to merit further investment. Consequently, the business has been closed. A loss of £1.8m, inclusive of all closure costs, was incurred in the first half of 2001 (2000 £0.6m).

Prospects

In the UK home credit division we expect the current market conditions to continue for this year and into next and so we will continue to concentrate on maintaining the quality of our lending. As a result, we continue to expect customer numbers, credit issued and profits for 2001 to grow at similar rates to those in 2000. The bad debt ratio is expected to remain stable at around the current level.

The international division's customer numbers, credit issued and profits are expected to grow substantially. The division as a whole is on target to report a profit in 2001, after bearing start-up losses of about £4m in developing Hungary and Slovakia and to earn increasing levels of profit thereafter.

We are closely monitoring the quality of lending in the division. In response to the recent increase in bad debt, we intend to ease slightly the rate of growth in customer numbers and credit issued to allow the better management of credit quality, particularly in the Czech Republic.

We continue to believe home credit has wide international appeal and our aim remains to launch our service in one new country each year.

The motor insurance market is cyclical and we are currently benefiting from conditions at the top of the cycle. We continue to expect another good result in 2001 but we have seen the first signs of more competitive market conditions.

Overall, we are making good progress and remain confident of a good result for 2001.

The cash flow statement above has been prepared in accordance with FRS1 (Revised 1996) "Cash Flow Statements". As required by that standard, the statement aggregates the cash flows arising from insurance and home credit divisions. However, the cash and investments held by the insurance division are required by its regulators to be strictly segregated from the rest of the group and are not available to repay group borrowings.

At 30 June 2001 the cash and investments held by the insurance division amounted to £386 million (30 June 2000 - £316 million)

Notes to the financial information

1. The financial information, which has been prepared on the basis of the accounting policies set out in the group's 2000 statutory accounts, does not constitute a set of statutory accounts and is unaudited. This document (the 2001 interim report) will be published on the company's website (in addition to the normal paper version). The maintenance and integrity of the Provident Financial website is the responsibility of the directors and the work carried out by the auditors does not involve consideration of these matters. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

2. The information relating to the full year ended 31 December 2000 is an extract from the latest published accounts on which the auditors gave an unqualified opinion and which have been delivered to the Registrar of Companies.

3. The taxation charge has been calculated by applying the directors' best estimate of the effective tax rate for the year, which is 28% (30 June 2000 - 27%), to the profit for the period.

4. Dividends paid and proposed.

	Unaudited Half-year to 30 June 2001 £'000	Unaudited Half-year to 30 June 2000 £'000	Audited Full year 2000 £'000

5. Earnings per share

The basic and diluted earnings per share figures have been calculated using the profit for the period attributed to ordinary shareholders of £50,551,000 (30 June 2000 - £47,535,000) and the weighted average number of shares in issue during the period.

The weighted average number of shares in issue during the period can be reconciled to the number used in the basic and diluted earnings per share calculations as follows:

	Unaudited Half-year to 30 June 2001	Unaudited Half-year to 30 June 2000	Audited Full year 2000
Weighted average number of shares in issue during the period	248,965,864	252,066,217	250,221,347

Independent review report to Provident Financial plc

Introduction

We have been instructed by the company to review the financial information which comprises the consolidated profit and loss account, statement of total recognised gains and losses, consolidated balance sheet, consolidated cash flow statement and related notes. We have read the other information contained in the interim report and considered whether it contains any apparent misstatements or material inconsistencies with the financial information.

Directors' responsibilities

The interim report, including the financial information contained therein, is the responsibility of, and has been approved by, the directors. The directors are responsible for preparing the interim report in accordance with the Listing Rules of the Financial Services Authority which require that the accounting policies and presentation applied to the interim figures should be consistent with those applied in preparing the preceding annual accounts except where any changes, and the reasons for them, are disclosed.

Review work performed

We conducted our review in accordance with guidance contained in Bulletin 1999/4 issued by the Auditing Practices Board for use in the United Kingdom. A review consists principally of making enquiries of management and applying analytical procedures to the financial information and underlying financial data, and based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is substantially less in scope than an audit performed in accordance with United Kingdom Auditing Standards and therefore provides a lower level of assurance than an audit. Accordingly, we do not express an audit opinion on the financial information.

Review conclusion

On the basis of our review we are not aware of any material modifications that

should be made to the financial information as presented for the six months ended 30 June 2001.
